SEACOAST REGIONAL ASSOCIATION

The Seacoast Region of New Hampshire consists of the towns bordering on the seacoast and tidewaters of the State.

These communities have common interest in economic betterment, in regional problems, and in necessary adjustments to changing conditions brought about by war emergencies.

The New Hampshire Seacoast Regional Development Association is the accredited organization through which this and other regional communities are brought together in combined efforts to attain their related objectives of development and improvements.

It serves the individual interests of the Community to the extent of its facilities in accordance with expressed desires of the Community.

There are five Regional Associations in New Hampshire.

The Seacoast Association organized in 1934 and incorporated in 1936 is the official State Co-ordinating agency for the Seacoast Region. The Executive Secretary is the only paid official and his salary is provided for by State appropriation administered by the State Planning and Development Commission under certain rules of procedure.

Consistent with the State Statute, City and Town appropriations, requested on an approximate basis of one one hundredth of one percent of net assessed valuation or less than 10 cents for a thousand dollars, are used for publicizing the resources of your community. Each com-

munity has representation on the Board of Directors and its representative citizens serve as members on committees.

The Association works in co-operation with Regional City and Town, State and Federal Departments and Officials, the State University Extension Services, the New England Council Chamber of Commerce, Farm, Industrial and other accredited organizations and has established contacts, brought about conferences and surveys and gathered information necessary to determining the needs of the Region. This work has contributed to developments and considerations which could be realized only through co-operative effort.

Promotional publicity, not only through publications but through personal contacts, conferences, information service and otherwise has brought year round business. The farm and the factory as well as the retail business, the professional and other services, and the resort business are all recipients of added income resulting from this work. Of added importance is the maintenance of tax producing property and individual benefits of employment.

In view of the necessary planning for the post war period this promotional work assumes more importance than ever.

Evidences of the work of Association officials and the various committees are most apparent but difficult to publicize. Bridges have been built, new highways constructed, others improved, funds are available for coastal protection and bridge construction when priorities permit. Industrial plants have received war contracts. Some of the needs of this vital defense area have been recognized by the Federal Government; some added transportation facilities have been provided; information on the population has been presented for purposes of securing adequate rationing quotas; surveys pointing to inland water area

development are in progress; development of fishery resources are in prospect and consideration is being directed to forestry and farm conservation needs.

The recently released report "A Plan for the Development of the Seacoast Region" prepared by the State Planning and Development Commission represents much time and work of the officers and committees, together with that of the State Commission.

The factual findings of this report have been proven to be of particular value for Federal and local use in the present emergency and with continued studies will be of the utmost importance for guiding future planning.

Copies of the report have been sent to Boards of Selectmen, City Officials and individuals who are contributing to the overhead expense of the Association.

The Association stands on its record of accomplishment with equal consideration for the interests of all regional communities and it is obvious in view of increasing demands for service that the value of regional co-operation is important to everyone.
